DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tominaga et al. (7038746).

Tominaga et al. teaches a polarizing plate comprising each and every structural element and material as stated in instant claim 1 (e.g., col. 6 line 60 to col. 7 line 12; col. 12 lines 1-47). Although Tominaga et al. does not explicitly state the properties stated in the claim it would have been obvious to do so because it is conventionally known that upon the use of the same materials to make the same structure the resulting product will yield the same properties (e.g., col. 6 line 60 to col. 7 line 12; col. 12 lines 1-47).

Thus claim 1 is rejected.

By the reasons and references given above, each and every element of each of claims 2-14 is rendered as obvious under Tominaga et al. Thus claims 2-14 are rejected.
